

Premium Oxy/LPG Professional Kit

Part No 434982517P

The 825 Regulators are ideally suited for mobile heavy duty. Snap Safe Protection is the answer to lifting safety to a new level. The HARRIS mixing system uses gas at much lower LPG pressure i.e. 1.5Kpa (measured at the tip) providing gas savings and increased safety.

Operators will enjoy that the high flow handle, will suit right hand and left hand users. Cutting attachment has a built in "ease-on" valve, for less sparks when starting and hot tips ensure quick starting. Kit includes Reg-End & Torch-End Flashback Arrestors complying with the most stringent Australian Standards (AS4839).

The Premium Kit will provide the trades professional with all the supporting Harris products to complete the widest range of tasks. The torch, cutter and mixer all comply to ISO 5172.
